

JOB DESCRIPTION

Financial Analyst Business Valuation

Business Valuation Analyst Functions:

- Gather information and data such as, but not limited to, financial statements, operational reports, industry and market research, and any other data or information required to thoroughly provide the contracted product to the client.
- Construct and take ownership of complex financial models utilized to determine the value of ownership interests in healthcare-related entities.
- Perform various financial analyses, develop financial models, conduct due diligence, and complete report writing. Review own work and that of teammates to ensure quality of product.
- Participate in calls and site visits as necessary and determined by supervisors.
- Keep all team members informed of project progress and keep all projects and deliverables on the time schedule established with the client. Immediately inform supervisor if circumstances arise to impede or jeopardize that timeline.
- Actively pursue continuing education and certifications such as CFA, NACVA, American Society of Appraisers, Certified Public Accounting, etc.
- Desire to become a thought leader within the industry by helping author internal and external content for articles and presentations.

Performance Expectations:

- Ability to work independently with minimum supervision. Attention to detail and ability to review personal work and peers' work.
- Superior written and oral communication skills. Ability to present ideas in a business-friendly language and tailor formal and informal communications to the audience. Ability to build consensus both internally and externally.
- Client-oriented work ethic and excellent interpersonal skills. Ability to build and manage relationships with key clients to ensure the success of each engagement.
- Excellent collaboration and team orientation skills.
- Desire to contribute thought leadership to engagements and organizational knowledge while working with a variety of personalities at all levels, both internally and externally.
- Tenacity, intellectual curiosity, and a drive for continuous improvement.

Role Requirements

- **Bachelor's degree and/or master's degree in finance or accounting**
- **Strong knowledge of financial and valuation theory**
- **Financial modeling experience**
- **Proficient in Microsoft Office; strong knowledge Excel, Word and PowerPoint**

Additional Information

Division Spotlight: Valuation & Transaction Advisory

What We Do: Healthcare Business Valuations & Transaction Advisory

VMG Health's Business Valuation Division provides expert opinions and advisory services. Acting as an independent third party, VMG Health performs thousands of business valuations each year in support of healthcare transactions to ensure regulatory compliance, assist clients without experience in valuation, or to provide both parties comfort that the consideration included in a transaction is consistent with market levels.

VMG Health has performed FMV business valuations for entities ranging from small, solo-physician practices to large, multi-facility health systems and everything in between. Our nationwide network of clients relies upon VMG Health's healthcare valuation services to assist with important deliverables related to strategic partnerships and alignment models.

VMG Health's unique combination of healthcare valuation and transaction advisory expertise sets us apart.

- **Fair Market Value (FMV) Opinions**
- **Fairness Opinions**
- **Business Combinations/Purchase Price Allocation**
- **Trade Name & Brand Valuations**
- **Derivatives Valuation & Stock-Based Compensation**
- **Market Studies & Consulting Services**
